PROFESSIONAL SUMMARY

Performance-driven Web Developer with 2 years of experience specializing in full-cycle web development, custom WordPress architectures (ACF, PHP), and modern frontend environments. Adept at executing complex website migrations, optimizing on-page SEO, and bridging the gap between web and mobile platforms through AI-assisted engineering workflows. Recognized for troubleshooting high-pressure technical issues and collaborating with cross-functional teams to deploy high-performance digital solutions. Seeking to bring advanced problem-solving skills and a strong technical foundation to a high-growth development team.

TECHNICAL SKILLS

- **Web Development:** WordPress (Theme & Plugin Customization, ACF), Drupal, ReactJS (basic)
- **Mobile Development:** React Native, Expo
- **Programming:** HTML, CSS, Javascript, JQuery, Typescript, PHP
- **Database:** MySQL, Firebase
- **Web Management:** Website Migration, SEO Implementation, Hosting & Domain Management (cPanel, Hostinger, DotPH)
- **Tools:** Git/GitHub, XAMPP, Globaltronics LED display systems
- **AI Tools:** ChatGPT, Gemini, Claude, Deepseek, Github Copilot
- **Soft Skills:** Problem-solving, Team Collaboration, Time Management, Independent Learning

WORK EXPERIENCE

ASYA DESIGN

Web Developer

Pasay City

November 2024 – Present

- Managed end-to-end SDLC (technical planning, architecture, development, testing, and deployment) for a cross-platform mobile QR-code inventory application using React Native (Expo), TypeScript, and Firebase.
- Engineered real-time backend and authentication logic with Firebase (Firestore, Storage, Auth), utilizing AI-assisted workflows (vibe coding) to accelerate debugging and release cycles.
- Engineered and maintained core company websites, ensuring maximum uptime, optimal performance, and seamless system functionality.
- Architected and revamped two major corporate websites using WordPress, significantly enhancing user experience (UX) and establishing brand-wide design consistency.
- Developed custom WordPress themes utilizing Advanced Custom Fields (ACF) to build dynamic, flexible, and tailored content layouts.
- Executed zero-downtime migrations of web assets from WHM/cPanel to Hostinger, ensuring secure data transitions and infrastructure optimization.
- Built an automated XAMPP restart script to eliminate downtime and streamline internal webmail workflows.
- Overseen digital infrastructure management, including domain registration, hosting environments (Hostinger, DotPH), and CMS content publishing workflows.
- Administered internal IT systems, handling employee network access control (MAC filtering via Ruckus/Ruijie), corporate email deployment, and general technical infrastructure support.

Glimsol Web & Digital Solutions

Quezon City

Web Developer

November 2023 – May 20

- Developed and revamped two fully responsive, user-friendly WordPress websites, ensuring cross-device compatibility and seamless navigation.
- Integrated and optimized multimedia content, text, and design elements in strict alignment with client brand guidelines.
- Implemented on-page SEO best practices, successfully improving site visibility, search engine rankings, and organic discoverability.
- Collaborated closely with UI/UX designers and content creators to ensure final deliverables perfectly met technical specifications and client expectations.
